Schedules and Locations *(save money and time)*

Besides the regularly scheduled classes open to the ‘public’, over the years HDE has presented Laser Welding Technology Classes and Workshops in major industrial and manufacturing cities in the USA. All the logistics in these locations are in place to continue offering these classes at a significant savings to the ‘end-users’ of lasers who plan to have several people trained at the same time.

Experience indicates that when the HDE Laser Welding Technology classes are presented at or near the company, the cost of training per person is less than ½ of the cost sending the person to the HDE public classes. There are other advantages having the HDE Laser Welding Technology classes at or near your site. The **savings** come from:

1. Travel costs – airfare, rental car, hotel room and meals
2. Travel time – some people may spend as much as 8 hours each way traveling to out-of-town locations.
3. Time to make travel arrangements.
4. Lost time on projects that require immediate personal attention. (You can take time off from the class to take care of urgent matters).

Only ONE course is scheduled for the ‘public’; it is in June in Minneapolis, MN **.

	Month	Date	Location	Status
2018	March	n/a	Kansas City	private - booked
	April	open	tbd*	private*
	May	open	tbd*	private*
	June	4 - 8	Minneapolis	Open for Registration **
	July			
	August	open	tbd*	private*
	September	open	tbd*	private*
	October	open	tbd*	private*

* If you wish HDE to bring the Laser Welding Classroom or Workshop training to your facilities (or near your facilities), please send to HDE the **Request for Quote (for on-site training)** as soon as possible and tell us your preferred dates and requirements.

Find the **Request for Quote Form** on the Main Menu of this Web Site – under **Registration Forms**.

** The June 2018 class in Minneapolis is open to the Public. Please fill out the **Registration Form** to attend the June class as soon as you have the approval (and the time) to attend. Early registration is recommended. The last 3 HDE classes were over-booked and sold out.

Find the **Registration Form** for the June 2018 class on the Main Menu of this Web Site – look under Registration Forms.

Registration is subject to HDE's Registration Policy. For details see the opening page of www.laserweldtraining.com.

For more information about the material covered in the classroom-workshop please return to the Main Page of this web site and click on '[Course Descriptions](#)'.

Please note:

No audio or image recording allowed during the presentation of these classes.

All material used in the Laser Welding Technology classes is copyright protected.
